**Reference: Letter DPS-0288 dated 6 May 1958, KDN to BJW**

**Dear Sir:**

The four (4) B Configurations being modernized for Customer 2 are serial numbers 1, 3, 7 and 17. We have been advised that necessary paperwork effecting transfer of these configurations has been accomplished by the cognizant depots.

We have three (3) A-1 Configurations which are short three (3) HR-731 Cameras and four (4) HR-730 Cameras. Estimated cost to overhaul, assuming the return of short components, is \$2,300.00.

One (1) A-2 Configuration is currently being used in performance of Red Dot tests. The estimated cost of overhaul is \$750.00 and can be performed at the completion of the test program.

In addition to A Configurations, several components such as shutters, magazines, timer assemblies, and case drives have been returned on project depot work orders. The estimated cost of overhaul on these components is \$3,000.00. A complete listing of component parts is contained in the Monthly Progress Report dated 6 May 1958 showing all M & O activity for Customers 1 and 2. Copies of this report were forwarded to you previously.

Work on the A-2 Configuration and components will be accomplished on a non-interference with B's basis. Work on A-1 Configurations will not be accomplished during the present fiscal year except for lens testing.

Very truly yours,

HYCON MFG. COMPANY
